

Batch numbers are needed to provide a unique reference for your product and provide traceability.

Due to slightly different customer needs & requirements between Extrusion and Process Customers, Exwold offer two standard batch coding systems which are generated as follows:

1) Standard batch numbering for Process (Brenda Road site)

Process batch code is formulated by Date format e.g.

- Mix Number
- Week Number
- Year

For example

01	35	15
(Mix Number)	(Week Number)	(Year)

2) Standard batch numbering for Extrusion (Haverton Hill, Wilton and Tofts Farm sites)

Extrusion Batch number is formulated by Alpha Numeric e.g.

- Company Name
- Year of Manufacture
- Week Number
- Mix Number

For example

EXW	15	35	2
(Exwold)	(Year)	(Week Number)	(Mix Number)

Based on the site of manufacture these batch numbering systems will be used as standard. When requested, we are however pleased to adopt your specific batch numbering system.

Contact us if you have any questions at enquiries@exwold.com or telephone 0044 1429 230340.
